PROJECTS

1. BOOK STORE WEBSITE (TEAM PROJECT) [Live Site Link](#) [Client side code](#) [Server side code](#)

- This is Full Stack books ecommerce website and it is a team project.
- On this website a buyer can buy a book easily. Here we show books according to categories.
- And in this website we implement dashboard, and three type of role there are admin seller and buyer role.
- Maximum design and functionality of this website was created by me because my team member was some personal issue.
- The parts of this website that I have worked on are design main card, design details page and implement it functionality, buyer review page, add to cart , wishlist, checkout page all conditional functionality, jwt verify, user role verify, subscribe ,footer and most of the dashboard functionality.

Used techonology : React, React Router, React-Redux, Express.js, Node.js, MongoDB, Firebase, ,Material UI, Tailwind CSS, Authentication, Vercel, Stripe, React Query.

2. USED LAPTOP SELL WEBSITE [Live Site Link](#) [Client side code](#) [Server side code](#)

- On this website, I created an admin role, seller role, and buyer role.
- A seller can post a product and a buyer can buy a product.
- Admin can see all buyers and products, and also can delete buyers or sellers.
- On this website I also created an advertisement system, A seller can advertise his products.
- And I also implement a payment method using stripe.

Used techonology : React, React Router, Express.js, Node.js, MongoDB, Firebase, Tailwind CSS, Authentication, Vercel, React-photo-view, Stripe, Axios, React Query.

3.TOURIST SERVICE WEBSITE [Live Site Link](#) [Client side code](#) [Server side code](#)

- On this website, a user can give his review.
- To create a review a user first signs in to this site.
- Here a user sees their review and another user's review.
- Users can update, create and delete their reviews.
- Here a user can post a service but first sign in this website,

Used techonology : React, React Router, Express.js, Daisy UI, Node.js, MongoDB, Firebase, Tailwind CSS, Authentication, Tailwind CSS, React-photo-view, Vercel.
